HyperDrive Agile, 2022

Professional Experience

SENIOR SOLUTION LEAD | *Daylight Automation*, 2021 - PRESENT

- ✓ Led an agile development team to implement digitization across pharmacy and banking sectors, leading several projects concurrently and consistently delivering against accelerated timelines
- ✓ Partnered with external clients to assess technical needs and develop solutions in a vue.js/ angular platform
- ✓ Completes hands-on development activities to implement client solutions in javascript, html/css, and full-integration with RESTful APIs in both production and development environments
- ✓ Successfully developed automation solution that revolutionized a core pharmacy process, achieving an over 90% adoption rate across the province of Ontario

ROBOTICS AUTOMATION LEAD (RPA) | *BMO - AI Center of Excellence*, 2019 - 2021

- ✓ Owned robotic projects end-to-end, leveraging agile methodology to coordinate scrum meetings, create project plans, assist in day-to-day firefighting
- ✓ Highly involved in automation solution design and architecture, on the ground to ensure that project is running smoothly from an infrastructure and coding perspective

PROCESS TRANSFORMATION ANALYST | *BMO - AI Center of Excellence*, 2018 - 2019

- ✓ Developed automation solution for US Private Bankers streamlining client-calls, with a revenue benefit of 2.5MM

LOGISTICS TEAM LEAD (VOLUNTEER) | *VentureOut Canada*, 2019 - 2020

- ✓ Led logistics team with a 6-figure budget that spans venue coordination, volunteer management, and more for the VentureOut Conference, Canada's first and largest conference for LGBTQIA+ in tech

PROCESS ENGINEER | *Imperial Oil*, 2016-2017

- ✓ Designed and implemented a robust flow control system, capturing $4.5MM in annual cost savings

Personal Projects

DUNGEONS & DRAGONS CHARACTER GENERATOR | Vue.JS, HTML, CSS, Express, Node.JS

- ✓ Randomly generates D&D character and populates custom PDF server-side for user to download

SUBSCRIBER PROFILE GENERATOR | JS, HTML, CSS, Express, Node.JS, MongoDB

- ✓ Generates subscriber profiles to store in Mongo database, delivering data with custom-built REST APIs
